References (in progress)

TABLE OF CONTENTS

§R.1. Foreword

Collected references for most Chapters (except those in progress) for books

> *Advanced Finite Element Methods*; master-elective and doctoral level, abbrv. AFEM
> *Advanced Variational Methods in Mechanics*; master-elective and doctoral level, abbrv. AVMM
> *Fluid Structure Interaction*; doctoral level, abbrv. FSI
> *Introduction to Aerospace Structures*; junior undergraduate level, abbrv. IAST
> *Matrix Finite Element Methods in Statics*; senior-elective and master level, abbrv. MFEMS
> *Matrix Finite Element Methods in Dynamics*; senior-elective and master level, abbrv. MFEMD
> *Introduction to Finite Element Methods*; senior-elective and master level, abbrv. IFEM
> *Nonlinear Finite Element Methods*; master-elective and doctoral level, abbrv. NFEM

Margin letters are to facilitate sort; will be removed on completion.

Note 1: Many books listed below are out of print. The advent of the Internet has meant that it is easier to surf for used books across the world without moving from your desk. There is a fast search "metaengine" for comparing prices at URL `http://www.addall.com`: click on the "search for used books" link. Amazon.com has also a search engine, which is poorly organized, confusing and full of unnecessary hype, but does link to online reviews. [Since about 2008, old scanned books posted online on Google are an additional potential source; free of charge if the useful pages happen to be displayed. Such files cannot be downloaded or printed.]

Note 2. Reference numbers change as the bibliographical database is updated and resorted, usually once per year. As a consequence, citations numbers in a book Chapter might be off target until the Chapter is "recompiled." (After all this is TEX, in which Chapters are just programs.)
